

## Reach your IT goals faster and easier. Without expanding your team.

*Want to support your data and analytics strategy in powerful ways?  
The Compendium Data Catalog is built by and supported by healthcare  
experts, and it's designed to help you drive more results with less effort.*

*“Compendium gives us more support —  
and costs less — than other data  
catalogs we considered.”*

**Amy Porwoll**

*CIO of CentraCare, who's leading data strategy for  
9 hospital locations, 30 clinics, and 11,000 employees*

# Six Ways Compendium Supports Your IT Goals

1

## Improve the exchange of information across your organization.

Compendium organizes all of your data — so everyone knows exactly what you have, where to find it, how to access it, and how to share it.

2

## Make data governance a reality.

Trying to wrangle all of your organization's data is a massive undertaking. Compendium streamlines the process — with hands-on coaching and support every step of the way.

3

## Shore up your data security.

If you want to protect your data, you have to know what you have. Compendium helps you easily organize and secure your digital assets.

4

## Increase trust in your data.

Eliminate the frustration of conflicting reports or inaccurate data. Compendium helps you align your metrics and ensure accurate insights, so everyone can trust what they see.

5

## Ensure transparency.

When someone has a question about a report (Who created it? How are the metrics defined? Where did the data come from?), Compendium provides the answers, easily.

6

## Optimize your EHR and your other digital data solutions.

Compendium helps you optimize the investments you've made in your organization's digital transformation — so none of your valuable data gets lost in the mix.

## Healthcare data isn't like other data. Your data catalog shouldn't be either.

Compendium is the only data catalog that's built specifically for healthcare data, healthcare leaders, and healthcare budgets — so you can get exactly what you need without paying for what you don't.

## Get more than just a data catalog.

Most data catalogs leave the heavy lifting to you. At Compendium, our coaches work shoulder to shoulder with your team to make sure you truly get the most out of your data. Plus, the Compendium Metric Hub, which comes free with the Data Catalog, will supercharge your analytics and transform the way you manage data.

## Choose the data catalog that's built for healthcare.
